KOSTIANTYN PRYKHODKO

Full Stack Developer

As a Front End developer, I bring over 6 years of experience in designing and implementing intuitive and responsive user interfaces using React, Redux, Vue, and other front-end technologies. In addition, I have 2 years of experience as a Full Stack developer, which enables me to understand the entire software development life cycle.

My expertise lies in developing scalable and maintainable applications using React, Vue.js, HTML, CSS, Javascript, Typescript, Node.js, GraphQL, RestAPI, and PostgreSQL. Throughout my career, I have demonstrated a strong aptitude for problem-solving and debugging issues in complex codebases. I have also worked on multiple projects in various domains, which have honed my ability to handle challenging requirements and tight deadlines.
Overall, I am a dedicated and proactive developer who is passionate about using cutting-edge technologies to build high-quality applications that exceed user expectations.

In addition, I am a natural problem-solver, with a positive attitude and a willingness to learn new technologies and approaches to improve my skills continually. I thrive in a fast-paced and dynamic work environment and enjoy working collaboratively with my colleagues to deliver innovative and high-quality software products.

HARD SKILLS

- JavaScript (ES5, ES6)
- TypeScript
- React/Redux/Sagas
- HTML5/CSS/SCSS
- Styled-Components/CSSModules
- jQquery/jQuery UI
- TailwindCSS
- TDD
- Unit/Integration/E2E Testing
- GIT
- AGGrid
- Vue.js/Vuex
- GraphQL/Apollo
- Node.js
- PostgreSQL/MySQL/MongoDB
- Bootstrap
- BEM
- AWS
- Agile
- Grunt/Gulp/Bower/Webpack

SOFT SKILLS

- Communication
- Time-management
- Attention to detail
- Teamwork
- Business acumen
- Problem-solving
- Adaptability
- Leadership
- Positive attitude
- User-centric mindset

EDUCATION

2011-2017	Master's degree	National Technical University 'Kharkiv Polytechnic Institute', faculty of Computer systems and networks, specialty – Computer engineering

LANGUAGES

English	B1
Russian	Native
Ukrainian	Native
German	A2(in progress)

PROFESSIONAL EXPERIENCE

Full-Stack Developer
AUGUST 2021 - FEBRUARY 2023

SoftServe

Development of websites, creating REST API, working with Rechart.js and AgGrid

Front-End Developer
MAY 2017 - AUGUST 2021

Aimprosoft

Development of websites, landing pages, and single page applications.

Front-End Developer
JUNE 2016 – MAY 2017

Freelance

MAJOR PROJECTS

PUBLIC REPUTATION WEBSITE

Platform:	Java
Database:	MySQL
Technologies:	JavaScript, JSX, SCSS, ReactJS, Node.js, Angular 1.x
Tools:	IntelliJ IDEA, GIT, Zeplin
Role:	Front-End Developer
Team size:	5

Public Reputation is a site for marketing. Users can review and check listings of different business items.

The site is oriented on the B2B sector. The platform contains public website, dashboard, review aggregation application, and a number of support tools.

The site was developed with AngularJS and ReactJS. The AngularJS part is used for public pages.

Shadow DOM, server rendering, and separate components for each site element are available.

The markup of the public website uses a schema.org vocabulary along with the Microdata.

Responsibilities:

Developing custom React components

Developing custom Angular modules

Implementing design features and responsive styles

Adding actions to components

Working with data from API

Adding microdata to tags
